Summary 47

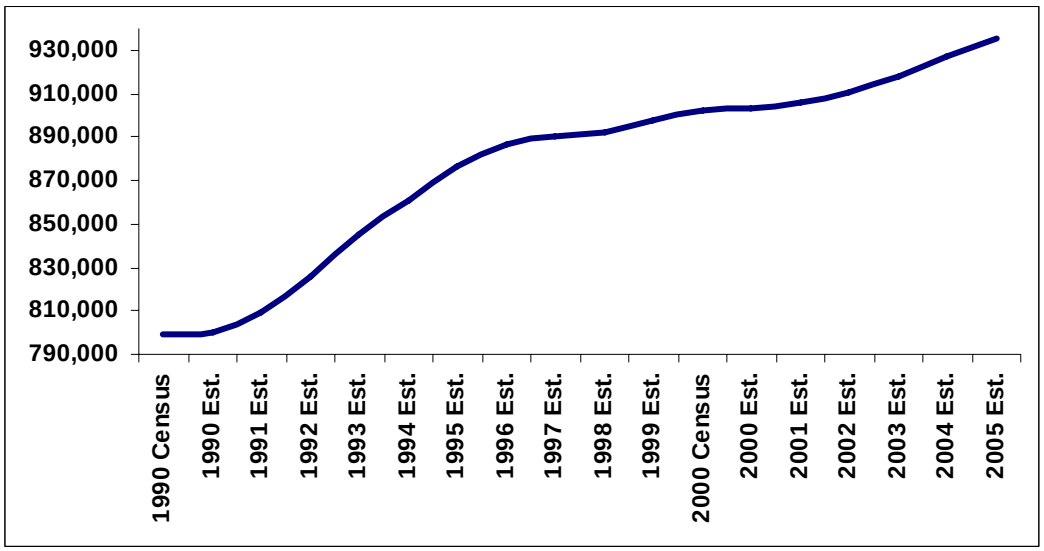
VOLUME II
DEMOGRAPHIC ANALYSIS

Volume II presents an analysis of Montana demographic data by county. These statistics include 1990 and 2000 Census population data as well as current population estimates. Certain social characteristics are also examined such as gender, age and race, population living in group quarters, marital status, veteran status, and school enrollment. Detailed data on the population with disabilities in Montana is also presented in the Appendix.

POPULATION

The U.S. Census Bureau releases decennial population figures (as of April 1) as well as annual estimates (as of July 1) using the decennial census data as the base. These estimates are periodically revised. Census 2000 reported the U.S. population as 281,421,906. Of the total U.S. population, approximately one-third of 1%, or 902,195 people lived in Montana. This was a 12.9% increase over the 1990 Census population of 799,065. The 1990 and 2000 Census figures as well as the most recent and revised estimates (as of April 2005) are pictured below:

MONTANA POPULATION GROWTH
U.S. Census Bureau



1990 Census	**799,065**			**2000 Census**	**902,195**			
1990 Est.	800,204	1995 Est.	876,553	2000 Est.	903,380	2005 Est.	935,670	
1991 Est.	809,680	1996 Est.	886,254	2001 Est.	905,954			
1992 Est.	825,770	1997 Est.	889,865	2002 Est.	910,395			
1993 Est.	844,761	1998 Est.	892,431	2003 Est.	917,885			
1994 Est.	861,306	1999 Est.	897,507	2004 Est.	926,920			

Population Density and Composition

Comparing 1990 to 2000 (decennial census), Montana's population increased 12.9%. Comparing 1995 to 2005 (population estimates), Montana's population increased 3.7%. From 1990 to 1995 Montana's population grew at an average rate of 1.8% per year, while from 1995 to 2005, Montana's population grew at an average rate of 0.9% per year.

The maps on pages four and five illustrate how Montana's population has changed: the eastern part of the state has shown a significant decline, while the western part of the state has shown a significant increase. While Montana's overall population has increased since 1995, every county in the eastern part of the state, except Yellowstone County and the surrounding counties of Big Horn, Carbon, Stillwater, Golden Valley, and Musselshell, have shown population decreases. These decreases range from 3.9% (Dawson) to 20.2% (Sheridan).

In the western part of the state, only six counties show a population decrease over the past 10 years: Cascade (1.5% decrease), Deer Lodge (12.2%), Pondera (2.9%), Teton 2.8), Beaverhead (2.1) and Silver Bow (4.6%). The remaining western counties all show an increase in population, ranging from 0.7% in Toole County to 31.9% in Gallatin County. Eleven counties in the western part of the state show population increases from 1995-2005 in excess of 10%: Broadwater, Flathead, Ravalli, Jefferson, Gallatin, Meagher, Lewis and Clark, Missoula, Granite, Lake and Mineral.

Below is the population growth in incorporated cities and towns vs. unincorporated areas. Historically, the unincorporated areas have shown more growth than the incorporated areas. However, since 2000 this trend appears to be slowing; possibly due to annexation of areas adjacent to cities and towns.

MONTANA POPULATION
CENSUS BUREAU

AREA	1970	1980	1990	2000	2005 (est.)	1970-2000 30-yr growth rate	1990-2000 10-yr growth rate	2000-2005 (est.) 5-yr growth rate
Incorporated Cities & Towns	427,850	437,273	453,884	484,384	514,573	13.2%	6.7%	6.2%
Unincorporated Areas	266,559	349,417	345,181	417,811	421,097	56.7%	21.0%	0.8%
TOTAL MONTANA	**694,409**	**786,690**	**799,065**	**902,195**	**935,670**	**29.9%**	**12.9%**	**3.7%**

Many of these areas will likely require major infrastructure improvements in the upcoming decades to keep pace with the growth.

County	Growth Rate 1970 – 2005 (est)		
	Incorporated	Unincorporated	Overall
Ravalli	106.0	203.3%	**177.2%**
Gallatin	98.4	239.0%	**140.6%**
Jefferson	9.0	199.8%	**113.2%**

Lake	60.9	113.0%	**95.9%**
Stillwater	61.7	83.4%	**83.4%**
Broadwater	42.2	122.3%	**78.8%**
Lewis & Clark	19.9	228.3%	**75.6%**
Missoula	113.3	29.2%	**71.8%**
Yellowstone	59.0	48.4%	**56.5%**

Other counties with significant population growth in their unincorporated areas from 1970 through 2005 were Park (108%), Sanders (95%), Glacier (83%), and Musselshell (76%). Detailed population statistics by incorporated cities and towns and unincorporated county areas for the decennial census from 1970 to 2000 and for the 2000 to 2005 estimates are shown in Table II.1.

Note: Totals may not add due to rounding, population in Yellowstone Nat. Park, or revised Census data.

* Consolidated city/county. Anaconda and Deer Lodge County consolidated their governments in 1977.

* Silver Bow County and the City of Butte, but excluding the town of Walkerville, consolidated their governments in 1977.

** Colstrip in Rosebud County was incorporated in 1998.

*** Note: This table does not include revised 1990 Census population counts. This table does include the 2005 Shelby revised population.

^ The county equivalent of Yellowstone National Park was merged into Gallatin County and Park County after the 1990 Census.

Compiled by: Census and Economic Information Center, Montana Department of Commerce, October 2006; www.ceic.mt.gov

The maps on the following pages show the growth rate from 2004-2005 and the 2005 population by county. The maps help illustrate the trend of more growth and higher population density in the western part of the state than in the eastern part of the state, which tends to have declining population and lower population density.

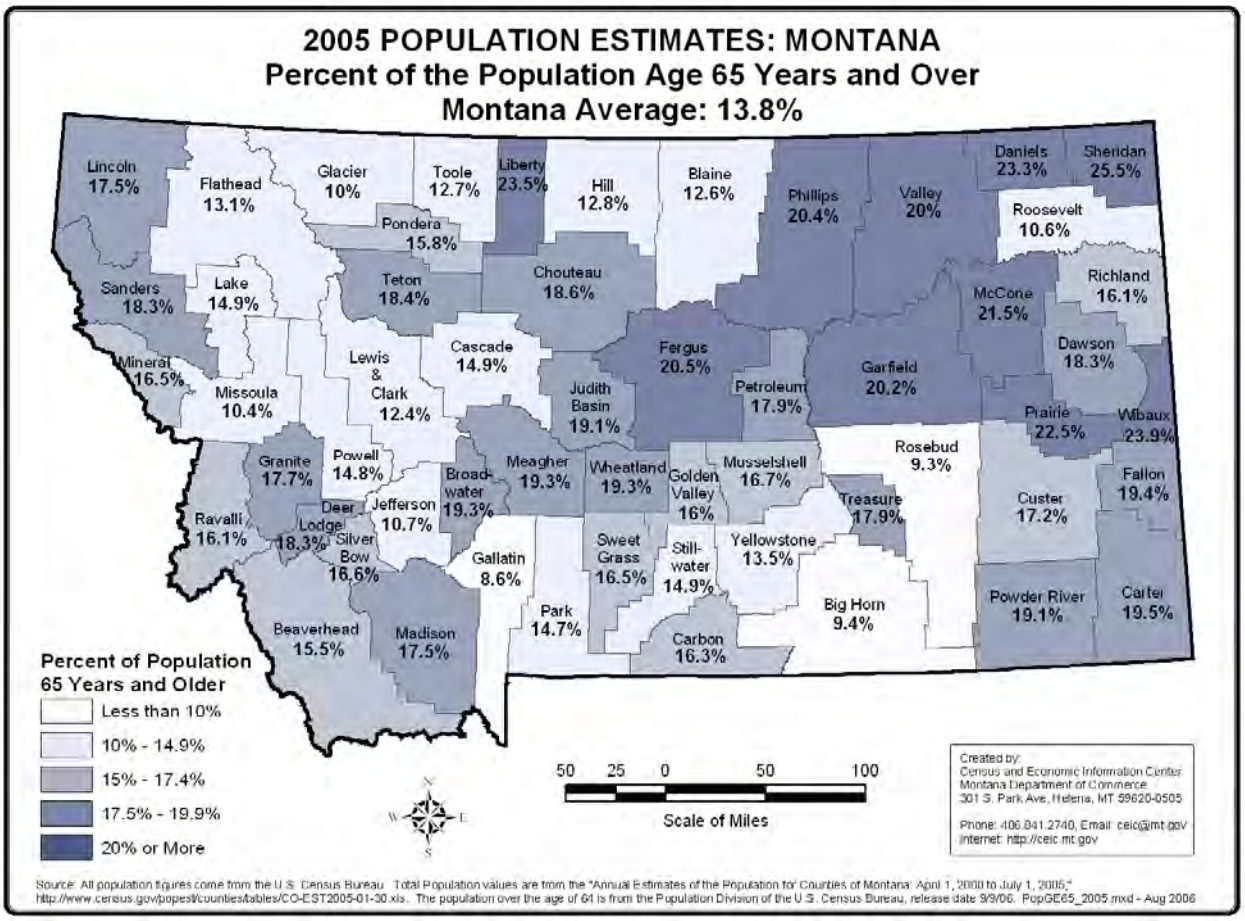
Source: Population Division, U.S. Census Bureau, Table 2: Cumulative Estimates of Population Change for Counties of Montana and County Rankings: April 1, 2000 to July 1, 2005 (CO-EST2005-01-30), Release Date: Mar 16, 2006.
Graphic by: Census & Economic Information Center, Montana Department of Commerce, 301 S. Park Ave, Helena, MT 59620-0505, 406-841-2740, ceic@mt.gov, http://ceic.mt.gov/Data_Maps.html - county_pop_est_nos05.gif or pdf

The composition of the population in Montana's counties differs between the eastern and western part of the state, particularly in the percentage of the total population that is over 65 years old. The darker shaded counties have a higher percentage of persons over 65 years old, and this is more prevalent in the eastern part of the state.



Below is the detail of the most recent (4/05) Census population estimates by county. Each time a new estimate is released, the most recent four years are reforecast.

Average household size	2.70	2.67	-1.4%		2.61	2.52	-3.6%	

In Montana in 2000, males comprised slightly less than one-half of the population, but represented a higher percentage than nationally. The 35-54 years age category was the largest in 2000 and also showed the greatest increase from 1900 to 2000. The 55 to 64 years and 65 & over years age categories showed increases from 1900 to 2000 that were higher than the nation. Additionally, there was a decrease in the 25 to 34 years age category. These trends point to an aging population in the state

Montana's population continues to be predominately white, with Native Americans comprising the second largest racial group. This composition is extremely different from the nation as a whole. While Native Hawaiians/Pacific Islanders and those who classified themselves as "some other race" showed the greatest increase from 1990 to 2000, these categories represented less than 1% of Montana's total population. Household size has continued to decrease in the U.S. and Montana, with Montana showing a greater decrease than the nation as a whole. Language spoken at home is shown in Table II.4 on the next page. English is the predominant language.

Population Living in Group Quarters

Volume III – Housing Profile contains information on housing units. Every person not living in a housing unit is considered to live in group quarters. Group quarters are classified as either institutional or non-institutional. Institutional group quarters include correctional institutions, nursing homes, and hospitals or schools for persons with a physical or mental disability. Non-institutional group quarters include group homes (such as communes or foster homes), emergency and transitional shelters, off-campus college housing, college dormitories, military quarters, and religious quarters.

Below is a summary of the Montana population living in group quarters in 1990 and 2000.

MONTANA POPULATION LIVING IN GROUP QUARTERS
Census Bureau

			CHANGE 1990-2000	
GROUP QUARTERS TYPE	**1990**	**2000**	**#**	**%**
Nursing Homes	7,764	6,470	-1,294	-16.7%
Correctional	2,174	4,124	1,950	89.7%
Other	1,187	1,474	287	24.2%
TOTAL INSTITUTIONAL	**11,125**	**12,068**	**943**	**8.5%**
College Dormitories	6,195	7,035	840	13.6%
Other	5,427	5,255	-172	-3.2%
Military Quarters	1,000	404	-596	-59.6%
TOTAL NON-INSTITUTIONAL	**12,622**	**12,694**	**72**	**0.6%**
TOTAL GROUP QUARTERS	**23,747**	**24,762**	**1,015**	**4.3%**

While the total population in group quarters has increased since 1990, the increase in the institutional type of group home was 14 times larger than the increase in the non-institutional type of group housing. Correctional institutions contributed most to this increase.

Total population in group quarters (Table II.5) and population in group quarters by type (Table II.6) for each county are on the following two pages. The counties with the largest increases in numbers were Yellowstone: 943 (47.5%); Missoula: 907 (33.4%); Silver Bow: 396 (56.9%); and Dawson: 338 (234.7%). The counties with the largest decreases in numbers were Park: 537 (-71.5%); Deer Lodge: 489 (-56.9%); Pondera: 440 (-85.1%): Glacier: 367 (-66.4%); and Hill: 354 (-50.7%).

By type of group quarter, Dawson and Yellowstone county numbers increased fairly evenly in both the institutional and non-institutional categories. Silver Bow's increase was primarily in the institutional category and Missoula's increase was primarily in the non-institutional category. As for decreases by type, Deer Lodge's decrease was primarily in the institutional category. Glacier, Hill, Park, and Pondera counties showed decreases primarily in the non-institutional category.

Marital Status

Over half of the population 15 years and over was married as of April 1, 2000. The lowest marriage rate was 47% in Roosevelt County and the highest was 70% in McCone County. Daniels County had the highest percentage of widowers at 11%, with 79% of those being female widowers. Powell County had the highest divorce rate (14%) and Gallatin County had the most people who were never married, 33%.

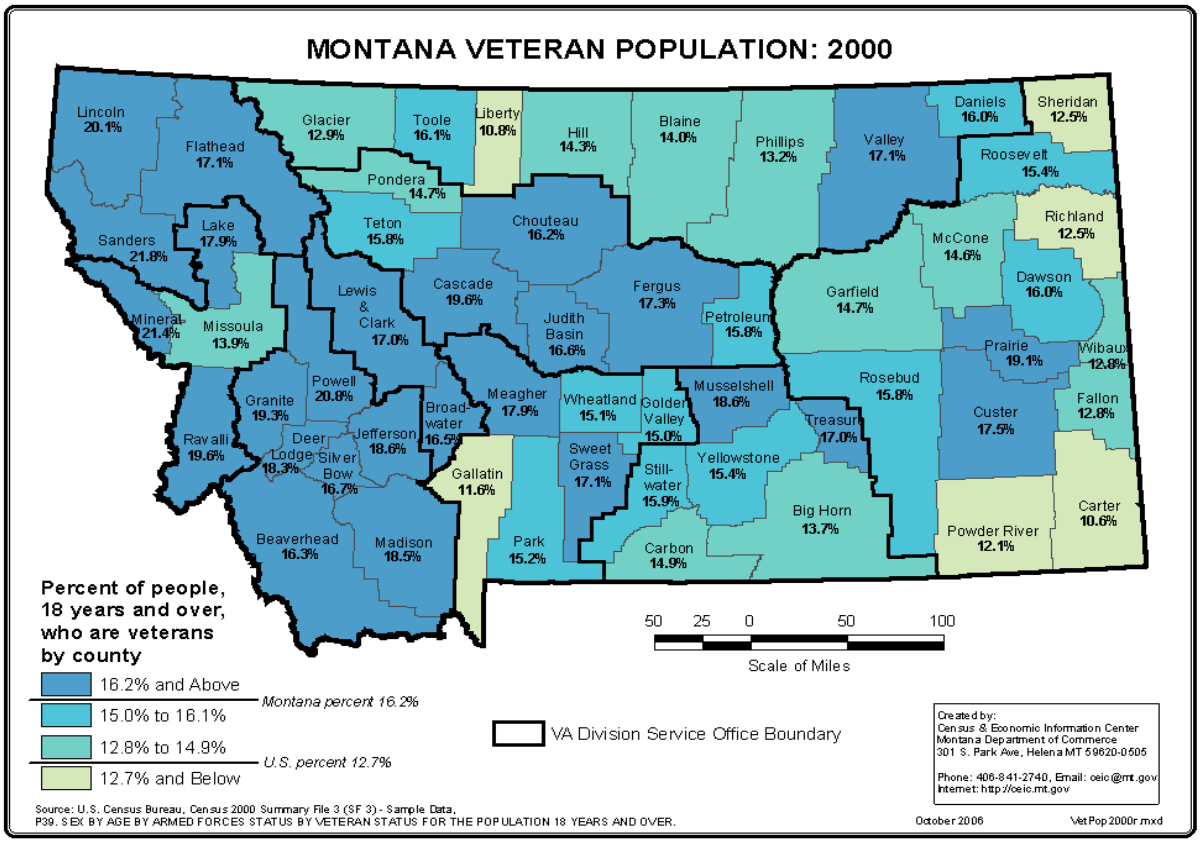
Detail of marital status by county is in Table II.7.

The "female widowed" and "female divorced" categories represent the number of females who are widowed or divorced. The percentage of female widowers as a percentage of total widowers was over 80%, as females have a longer life expectancy than males. The percentage of female divorced as a percentage of total divorced was 53.6.

Veteran Status

As of 2000, Veterans represented 16.2% of the Montana civilian population 18 years and over. The following counties had veteran populations in excess of 20%: Cascade, Lincoln, Mineral, Powell, and Sanders.

Detail of veteran status by county is shown in the following map and in Table II.8.



School Enrollment

In 2000, there were 241,754 persons age 3 and older in Montana who were enrolled in school. This does not mean that all these students were enrolled in Montana schools, however, since the Census counts Montana residents attending out-of-state schools. In 1990, there were 215,733 persons age 3 and older enrolled in school. There was a 12.1% increase in the number of persons enrolled in school from 1990 to 2000.

Detail of school enrollment by county is in Table II.9.

TABLE II.7

DISABLED POPULATION

The U.S. Census Bureau provides numerous statistics on persons with disabilities. The data on disability status were derived from answers to long-form questionnaire items 16 and 17. Item 16 was a two-part question that asked about the existence of the following long-lasting conditions: (a) blindness, deafness, or a severe vision or hearing impairment (sensory disability), and (b) a condition that substantially limits one or more basic physical activities such as walking, climbing stairs, reaching, lifting, or carrying (physical disability). Item 16 was asked of a sample of the population five years old and over.

Item 17 was a four-part question that asked if the individual had a physical, mental, or emotional condition lasting 6 months or more that made it difficult to perform certain activities. The four activity categories were: (a) learning, remembering, or concentrating (mental disability); (b) dressing, bathing, or getting around inside the home (self-care disability); (c) going outside the home alone to shop or visit a doctor's office (going outside the home disability); and (d) working at a job or business (employment disability). Categories 17a and 17b were asked of a sample of the population five years old and over; 17c and 17d were asked of a sample of the population 16 years old and over.

For data which use a disability status indicator, individuals were classified as having a disability if any of the following three conditions was true: (1) they were five years old and over and had a response of "yes" to a sensory, physical, mental or self-care disability; (2) they were 16 years old and over and had a response of "yes" to going outside the home disability; or (3) they were 16 to 64 years old and had a response of "yes" to employment disability.[1]

Census 2000 counted 49.7 million people or 17.7% of the total population as having some type of disability, per the definition above. Of Montana's population, 145,732 people or 16.2% of the total population had a disability in 2000. A map of people with disabilities by county is on the following page. The rates by county range from a low of 15.5% in Sweet Grass to a high of 26.1% in Wibaux.

A summary of disability by age and sex as a percentage of the civilian non-institutional population age 5 years and older is in Table II.10. Note: the total disability rate (17.5%) shown in the table is higher than the rate noted above (16.2%) because the population base is different: the civilian non-institutional population age 5 years and older vs. the total Montana population.

The maps on pages 27-29 show percent of population with a disability by age group.

People 5 years old and over are considered to have a disability if they have one or more of the following:
(a) blindness, deafness, or a severe vision or hearing impairment;
(b) a substantial limitation in the ability to perform basic physical activities, such as walking, climbing stairs, reaching, lifting, or carrying;
(c) difficulty learning, remembering, or concentrating; or
(d) difficulty dressing, bathing, or getting around inside the home.

SOURCE: U.S. Census Bureau, Census 2000, Summary File 3, Table P42. Sex by Age by Disability Status by Employment Status for the Civilian Nonistitutionalized Population 5 Years and Over.
DEFINITION: People 21 years and over are considered to have a disability if they have one or more of the following: a) blindness, deafness, or a severe vision or hearing impairment; b) a substantial limitation in the ability to perform basic physical activities, such as walking, climbing stairs, reaching, lifting, or carrying; c) difficulty learning, remembering, or concentrating; d) difficulty dressing, bathing, or getting around inside the home; e) difficulty going outside the home alone to shop or visit a doctor's office; f) difficulty working at a job or business (age 21-64). ** NOTE: This is not the same as the Behavioral Risk Factor Surveillance System (BRFSS) definition of disability. The BRFSS definition is: limited in any activities or use special equipment, people 18 years and over.

Poverty Status for Person with Disabilities

The Census reported the following statistics in 2000 for poverty status for the population with disabilities:

TABLE II.14
POVERTY STATUS FOR DISABLED POPULATION BY SEX AND AGE
Census 2000

	Male			Female			Total Disabled Population		
	Total Disabled	Below Poverty Level	% of Disabled Population	Total Disabled	Below Poverty Level	% of Disabled Population	Total Disabled	Below Poverty Level	% of Disabled Population
5 to 15 years	5,139	1,387	1.8%	2,563	715	1.0%	7,702	2,102	1.5%
16 to 20 years	3,590	926	1.2%	2,812	903	1.3%	6,402	1,829	1.3%
21 to 64 years	46,649	9,138	12.1%	38,421	9,843	14.3%	85,070	18,981	13.1%
65 years and older	20,303	1,735	2.3%	24,981	3,857	5.6%	45,284	5,592	3.9%
Total Disabled Population	**75,681**	**13,186**	**17.4%**	**68,777**	**15,318**	**22.3%**	**144,458**	**28,504**	**19.7%**

** Total persons with disabilities of 144,458 reported with poverty statistics differs by 1,274 from total disabilities reported of 145,732 (Table II.10) because poverty status was not determined for 1,274 disabled people.

Overall, 19.7% of the population with disabilities was below the poverty level. This is higher than Montana's overall poverty rate of 14.1%. It is reasonable that the poverty rate is lower for those under 21, as many are cared for by parents or other adults. Nor is it surprising that the poverty rate is lower for those 65 years and older, as they are eligible for social security. The poverty rate is highest for those ages 21 to 64 years; typically, this age group would be in the workforce although it is reasonable to assume that many disabled persons in this age group are unemployed or employed in very low paying jobs.

The following two tables detail poverty status for persons with disabilities by sex for each county:

Table II.15 Disabled Population Poverty Status – Male
Table II.16 Disabled Population Poverty Status – Female

The following tables represent people with a disability.

TABLE II.15

Employment Status of Persons with Disabilities

Census 2000 reported that 54.8% of the total population with disabilities between the ages of 16 and 64 years old were employed:

TABLE II.17
DISABLED EMPLOYMENT STATUS BY SEX AND AGE
Census 2000

	16 to 20 Years Old			21 to 64 Years Old			Total 16 to 64 Years Old		
	With a Disability	Number Employed	% Employed	With a Disability	Number Employed	% Employed	With a Disability	Number Employed	% Employed
Male	3,882	1,714	44.2%	46,817	26,996	57.7%	50,699	28,710	56.6%
Female	3,038	1,563	51.4%	38,520	20,313	52.7%	41,558	21,876	52.6%
Total	**6,920**	**3,277**	**47.4%**	**85,337**	**47,309**	**55.4%**	**92,257**	**50,586**	**54.8%**

The percentage for males 16 to 64 years old was 56.6%, while the percentage for females was lower at 52.6%. These employment rates support the fact that the poverty rate is higher for persons with disabilities than it is for the general population.

Detail of disabled employment status by sex for each county is on the following two pages:

Table II.18 Disabled Employment Status – Male
Table II.19 Disabled Employment Status – Female

The following tables represent people with a disability.

Educational Enrollment and Attainment for Persons with Disabilities

While education enrollment was similar for both males and females with disabilities, education attainment was not. Other than an associate degree, males had higher attainment rates for all levels of education.

Educational attainment among persons with disabilities also differed from the general population. Among persons with disabilities, 7.2% attained a bachelors' degree or higher, while 24.4% of the state's population as a whole did so.

State and Federal Assistance for Persons with Disabilities

On the following five pages, statistics are presented on government aid for persons with disabilities. The source for this data is the Montana Department of Health and Human Services and the Social Security Administration. The following data is presented by county (all data is the most recent available):

Table II.23 Medicaid Recipients and State Mental Health Recipients – 2004 to 2005
Table II.24a SSI Recipients 2004
24b SSI Recipients 2005
24c SSI Recipients % Change 2004 – 2005
Table II.25 SSDI Recipients and Children Receiving Disability Services

Supplemental security income (SSI) helps aged, blind, and other people with disabilities that have little or no income by providing monthly cash payments to meet basic needs for food, clothing, and shelter.

Social security disability insurance (SSDI) pays benefits to persons with disabilities that have worked long enough and paid Social Security taxes.

If a recipient moves between counties during the year, they are included in each county's total, but only once in the Montana total.
# of recipients is average recipients per month.

Children 0-5 years receiving or waiting for developmental disability services as of November 2006, MT DPHHS.
Children 3-22 receiving disability services as of December 2003, MT OPI.

SUMMARY

Over the past 10 years, Montana's population density and growth was centered in the western part of the state. The eastern part of the state has seen a decrease in total population and an increase in the elderly population as a percentage of total population. This changes the demand for housing and the type of housing needed in these areas.

The population with disabilities has a higher poverty rate and lower employment status than the general population. This, coupled with this population's special needs, makes it a challenge to provide safe, affordable housing for persons with disabilities throughout the state.
